IMPORTANT NOTES ON CHANGES TO DATA

Findings published in this report use the latest available data at the time of production. In order to provide the most accurate and up-to-date information, we have changed the sources we use to inform some of the numbers, and we have also changed the ways in which we calculate certain values. Consequently, various figures in this report **will not be comparable** with similar figures that we published in previous Global Digital Reports. Wherever such changes affect data in this report, we have included a **◆ COMPARABILITY ADVISORY** in the footnotes of each relevant slide, and in some cases we've also added an alert beneath the chart's headline. In particular, please note that we **no longer include data sourced from social media platforms** in our internet user figures. As a result, the internet user numbers in this year's reports may appear lower than those in previous reports, but this does not necessarily imply an actual drop in internet users. We have recalculated historical internet user figures in order to provide accurate growth figures in this year's reports, but **overall values will not be comparable** with data published in previous reports in this series. Please also note that **social media user numbers may not represent unique individuals**, because some people may manage multiple social media accounts, and because some active social media accounts may represent 'non-human' entities such as animals, groups and organisations, locations, and more. As a result, the figures we publish for social media users may **exceed** the figures we publish for internet users. This may seem counter-intuitive, but the numbers in such instances are not incorrect. Separating social media user numbers from internet user numbers in this way allows readers to make more informed choices, and enables them to use the data that has the greatest relevance to their needs. Please see the complete list of data sources at the end of this report for further details.

SPECIAL THANKS: GSMA INTELLIGENCE

The logo for GSMA Intelligence, featuring the text "GSMA" in a small red font above the word "Intelligence" in a larger black font, all contained within a white circular background.

GSMA Intelligence is the unit within the GSMA that houses the organisation's extensive database of mobile operator statistics, forecasts, and industry reports. GSMA Intelligence's data covers every operator group, network and MVNO in every country – from Afghanistan to Zimbabwe. Updated daily, it is the most accurate and complete set of industry metrics available, comprising tens of millions of individual data points.

Leading operators, vendors, regulators, financial institutions and third-party industry players rely on GSMA Intelligence to support strategic decision-making and long-term investment planning. The data is used as an industry reference point and is frequently cited by the media and by the industry itself. GSMA Intelligence's team of analysts and experts produce regular thought-leading research reports across a range of industry topics.

SPECIAL THANKS: APP ANNIE

App Annie is the industry's most trusted mobile data and analytics platform. App Annie's mission is to help customers create winning mobile experiences and achieve excellence. Founded in 2010, the company launched the first mobile market data solution. In 2020, App Annie launched App Annie Ascend, an advertising analytics solution, making it the first company in its space to offer a side-by-side view of market data and companies' own data to support mission-critical business decisions. Together, these solutions comprise the industry's most complete mobile performance platform. More than 1,100 enterprise clients and 1 million registered users across all geographies and industries rely on App Annie to drive their mobile business. The company is headquartered in San Francisco with 12 offices worldwide.

NOTES ON DATA VARIANCE, MISMATCHES, AND CURIOSITIES

This report uses data from a wide variety of sources, including market research agencies, internet and social media companies, governments and public bodies, news media, journalists, and our own internal analysis.

Wherever possible, we've prioritised data sources that provide broader geographical coverage, in order to minimise the potential variations between data points, and offer more reliable comparison across countries. However, where we believe that an individual metric provides a more reliable reference, we've used such individual numbers to ensure the most accurate reporting.

Furthermore, due to differing data collection and treatment methodologies used by these organisations, and the different sample periods during which data were collected, there may be significant differences in the reported metrics for similar data points throughout this report. In particular, data collected via surveys often vary from one report to another, even if those data were collected by the same organisation using the same approach in each wave of research.

Similarly, reports of internet user numbers vary considerably between different sources. In part, this is because there are fewer commercial imperatives for governments and regulators to collect, collate, and publish regular internet user data.

Prior to our Digital 2021 reports, we included data sourced from social media platforms' self-service advertising tools in our calculations of internet user numbers, but we no longer include this data in our internet user figures.

This is because the user numbers reported by social media platforms are typically based on active user accounts, and may not represent unique individuals. For example, one person may maintain more than one active presence (account) on the same social media platform. Similarly, some accounts may represent 'non-human' entities, including: pets and animals; historical figures; businesses, causes, groups, and organisations; places of interest; etc.

Because we separate social media user numbers and internet user numbers, the figures we report for social media users may exceed

internet user numbers in some countries. In such instances, these figures do not represent errors. Rather, these differences may indicate delays in the reporting of internet user numbers, or they may indicate higher instances of individuals managing multiple accounts, and / or of 'non-human' social media accounts.

Please also note that we've changed the source for a various data points in this year's reports, and a number of historical metrics that we reported in previous Global Digital reports have been revised by the original data provider. As a result, some figures in this year's reports may appear to have changed in unexpected ways. Wherever we're aware of these changes, we've included details in the footnotes of each relevant chart, but please use caution when comparing data from different reports, because changes to base data may mean that values are not comparable.

If you have any questions about specific data points in these reports, or if you'd like to offer your organisation's data for consideration in future reports, please email our reports team: reports@kepios.com.

DISCLAIMER AND IMPORTANT NOTES

This report has been compiled by Kepios Pte. Ltd. ("Kepios"), We Are Social Ltd. ("We Are Social"), and Hootsuite Inc. ("Hootsuite") for informational purposes only, and relies on data from a wide variety of sources, including but not limited to public and private companies, market research firms, government agencies, NGOs, and private individuals.

While Kepios, We Are Social, and Hootsuite strive to ensure that all data and charts contained in this report are, as at the time of publication, accurate and up-to-date, neither Kepios, nor We Are Social, nor Hootsuite shall be responsible for any errors or omissions contained in this report, or for the results obtained from its use.

All information contained in this report is provided "as is", with no guarantee whatsoever of its accuracy, completeness, correctness or non-infringement of third-party rights and without warranty of any kind, express or implied, including without limitation, warranties of merchantability or fitness for any particular purpose.

This report contains data, tables, figures, maps, flags, analyses and technical notes that relate to various geographical territories around the world, however reference to these territories and any associated elements (including names and flags) does not imply the expression of any opinion whatsoever on the part of Kepios, We Are Social, Hootsuite, or any of the featured brands, nor any of those organisations' partners, affiliates, employees or agents, concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

This report is provided with the understanding that it does not constitute professional advice or services of any kind and should therefore not be substituted for independent investigations, thought or judgment. Accordingly, neither Kepios, nor We Are Social, nor Hootsuite, nor any of the brands or organisations featured or cited herein, nor any of their partners, affiliates, group companies, employees or agents shall, to the fullest extent permitted by law, be liable to you or anyone

else for any direct, indirect, punitive, incidental, special, consequential, exemplary or similar loss or damage, or loss or damage of any kind, suffered by you or anyone else as a result of any use, action or decision taken by you or anyone else in any way connected to this report or the information contained herein, or the result(s) thereof, even if advised of the possibility of such loss or damage.

This report may contain references to third parties, however this report does not endorse any such third parties or their products or services, nor is this report sponsored, endorsed or associated with such third parties.
